Ballpoint pen Skyton

New

512797

Own production in Germany

All our promotional writing instruments are produced 100% in Germany. The production sites of our family business are located in recreational areas in the Black Forest and the Harz Mountains.

Climate neutral production

This is how climate neutral production at Schneider works:
In conjunction with ClimatePartner, Schneider has computed the carbon footprint for the entire company and all facilities and has taken measures to reduce carbon emissions as much as possible. We have also calculated the unavoidable emissions (product carbon footprint) that still occur during the manufacture of our products and we offset these by investing in certified international climate protection projects.

All promotional writing instruments from Schneider are produced in a climate-neutral manner.
